CATARACT PRE-OPERATIVE DROPS

Pre-Op Instructions: **THREE days BEFORE** surgery start VIGAMOX (tan top) **AND** ACULAR LS (or Ketorolac) (gray cap) **FOUR times a day** in the operative eye.

Make sure to wash the area around the eye before instilling the drop, and do not touch the tip of the bottle with your finger or to your face or eye.

A convenient time to take drops is:
1) Upon waking
2) Lunchtime
3) Dinnertime
4) Before going to bed

Remember: Nothing to eat or drink after midnight the day before surgery.

Take your regular morning pills with a **SIP** of water before coming in.

If you are diabetic, do **NOT** take any diabetic pills or injections on the morning of surgery.
